Profile

Data Science student with hands-on experience building predictive models, performing data analysis, and developing end-to-end data-driven solutions. Making myself strong in Python, SQL, and machine learning with a focus on solving practical business problems.

Education

Bachelor of Engineering in DATA SCIENCE,

Bangalore, India

Aditya College of Engineering and Technology

Bachelor's in Data Science with strong foundations in statistics, machine learning, data structures, SQL, and Python, including hands-on projects in predictive modeling, data analysis, and real-world problem solving.

Pre - University Course, Bishop Cotton Women's

Bangalore, India

Christian Independent PU College

Opted Course:- PCMC

Secondary school (10th), Baldwin Girls' High School

Bangalore, India

Technical Skills

Python (Pandas, NumPy), SQL, Data Analysis & EDA, Data Visualization, Statistics, Excel

Projects

Credit Card Fraud Detection System

- Built ML models to detect fraudulent transactions from imbalanced datasets
- Applied data cleaning, feature engineering, and model evaluation
- Improved detection accuracy using precision-recall metrics

Clinical Trial Recommendation Platform

- Developed a system matching patient profiles to trial eligibility conditions
- Built full-stack data workflows for collection and processing
- Led team development and optimized system through iterative testing

Certificates

Python for Data Science

Courses

Data Analytics with Python, IIT Roorkee

01/2026 – 04/2026 | Bangalore, India

Currently undergoing training in “Data Analytics with Python” by IIT Roorkee, focusing on data cleaning, visualization, and analytical techniques using Python.

Python for Data Science, IIT Madras

07/2024 – 08/2024 | Bangalore, India

Trained through IIT Madras’ Python for Data Science course emphasizing real-world data cleaning, analysis, and insight generation.
