PROFILE

Data Science undergraduate with hands-on experience building machine learning, predictive pipelines in Python. Skilled in handling imbalanced dataset, feature engineering, and SQL-based analysis.

EDUCATION

Aditya College of Engineering and Technology, Bangalore, India

Bachelor of Engineering in DATA SCIENCE

- **Relevant coursework: Statistics, Machine Learning, Data Structures, SQL, Python**

Bishop Cotton Women's Christian Independent PU Bangalore, India

College, Pre - University Course (PCMC)

Baldwin Girls' High School Bangalore, India

Secondary school (10th Grade)

TECHNICAL SKILLS

Languages & Tools: Python, SQL, Excel |

Data Science: Data Analysis, Data Visualization, Statistics, Machine Learning(scikit-learn basics) |

Other: API Integration, Generative AI (basics)

PROJECTS

Credit Card Fraud Detection System

- Built and evaluated machine learning models in Python to detect fraudulent transactions in a highly imbalanced dataset
- Applied data cleaning, feature engineering, and resampling techniques to improve model reliability
- Benchmarked models using precision - recall metrics, prioritizing-detection sensitivity over raw accuracy

Clinical Trial Recommendation Platform

- Led a team to build a platform matching patient profiles to clinical trial eligibility criteria.
- Designed end-to-end data workflows for collecting, cleaning and processing patient and trial data
- Iteratively tested and refined the matching logic to improve recommendation accuracy

OptiWaste AI: Predictive Waste Collection and Intelligent Resource Matching Platform,

Currently working

- Researching AI-driven approaches to waste-management, identifying key data and operational challenges.
- Evaluating models for waste-volume prediction, route optimization and waste classification.
- Proposing a scalable system architecture integrating predictive analytics with real-time resource matching.

CERTIFICATIONS & COURSES

Data Analytics with Python  , IIT Roorkee	01/2026 – 04/2026 Bangalore, India
Python for Data Science  , IIT Madras	07/2024 – 08/2024 Bangalore, India

ADDITION INFORMATION

Languages: English, Kannada, Tamil, Hindi
Strengths: Communication, Analytical Thinking, Problem Solving, Leadership, Adaptability, Attention to Detail
