Profile

Data Science student training in Python, SQL, and machine learning with hands-on experience in predictive modeling, data analysis, and clear technical communication.

Education

Bachelor of Engineering in DATA SCIENCE,

Bangalore, India

Aditya College of Engineering and Technology

Key coursework: Statistics, Machine Learning, Data Structures, SQL, Python; hands-on projects in data analysis and predictive modeling.

Pre - University Course,

Bangalore, India

Bishop Cotton Women's Christian Independent PU College

Opted Course:- PCMC

Secondary school (10th), Baldwin Girls' High School

Bangalore, India

Technical Skills

Python, Data Analysis, Data Visualization, Statistics,
Excel, SQL, API Integration, Machine
Learning(Basics), Gen AI(Basics)

Projects

Credit Card Fraud Detection System

- Built ML models to detect fraudulent transactions from imbalanced datasets
- Applied data cleaning, feature engineering, and model evaluation
- Improved detection accuracy using precision-recall metrics

Clinical Trial Recommendation Platform

- Developed a system matching patient profiles to trial eligibility conditions
- Built full-stack data workflows for collection and processing
- Led team development and optimized system through iterative testing

OptiWaste AI: Predictive Waste Collection and Intelligent Resource Matching Platform,

Currently working

- Performed comprehensive research on AI and data-driven waste management systems, identifying key challenges and opportunities.
- Evaluated multiple research models in waste prediction, routing optimization, and classification.
- Proposed a scalable architecture for an intelligent waste management platform integrating AI and analytics.

Certificates

Python for Data Science

Data Analytics with Python

Courses

Data Analytics with Python, IIT Roorkee

01/2026 – 04/2026 | Bangalore, India

Python for Data Science, IIT Madras

07/2024 – 08/2024 | Bangalore, India

Languages

English

Kannada

Hindi

Tamil

Strength

- Communication
- Analytical Thinking
- Problem Solving
- Leadership
- Adaptability
- Attention to Detail
